

## Quality Policy

AmSafe Bridport is committed to providing safe, high-quality design, manufacturing, and repair services to our customers through the continual improvement of our people, processes, and systems.

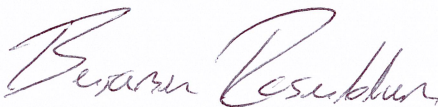

### Our Aim

AmSafe Bridport will ensure quality excellence and a sound business culture by:

- Consistently exceeding our customers' expectations for product quality and delivery performance by ensuring our on-time delivery targets are met or exceeded, minimising customer returns, and measuring customer perception to act on feedback.
- Creating an environment where everyone can contribute to continuous improvement.
- Developing a culture that promotes open, honest communication on quality and safety matters, enabling us to reduce the risk of safety-related occurrences.
- Ensuring all teammates receive suitable and sufficient training for their required tasks.
- Continually improving our supplier relationships.
- Maintaining all required aerospace and other regulatory approvals.

Every teammate plays a vital role in realising the objectives of this Quality Policy and in taking the actions necessary to ensure our success.

This policy is displayed on company noticeboards, available on the intranet portal, and can be provided to interested parties on request.
